Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of developing International Standards is carried out through ISO technical committees. Every member body interested in a subject for which a technical committee has been authorized has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work.

Draft International Standards adopted by the technical committees are circulated to the member bodies for approval before their acceptance as International Standards by the ISO Council.

International Standard ISO 1040 was developed by Technical Committee ISO/TC 59, *Building construction*.

This second edition was submitted directly to the ISO Council, in accordance with clause 6.11.2, part 1 of the Directives for the technical work of ISO. It cancels and replaces the first edition (i.e. ISO 1040-1973), which resulted from the transformation into an International Standard of ISO Recommendation R 1040/1-1969 and ISO Recommendation R 1040/2-1970.

ISO/R 1040/1-1969 had been approved by the member bodies of the following countries :

Austria	India	Romania
Belgium	Iran	South Africa, Rep. of
Canada	Israel	Spain
Chile	Italy	Sweden
Cuba	Korea, Dem. P. Rep. of	Switzerland
Denmark	Korea, Rep. of	Thailand
France	Netherlands	Turkey
Greece	Norway	Yugoslavia
Hungary	Poland	

The member bodies of the following countries had expressed disapproval of the document on technical grounds :

Finland
Germany, F. R.
United Kingdom

ISO/R 1040/2-1970 had been approved by the member bodies of the following countries :

Australia	India	South Africa, Rep. of
Austria	Iran	Spain
Belgium	Israel	Sweden
Brazil	Italy	Switzerland
Denmark	Netherlands	Thailand
Egypt, Arab Rep. of	Norway	Turkey
Finland	Peru	USA
France	Portugal	USSR
Hungary	Romania	

The member bodies of the following countries had expressed disapproval of the document on technical grounds :

Germany, F. R.
United Kingdom

This second edition (i.e. ISO 1040-1983) has been approved by the United Kingdom.

Building construction — Modular coordination — Multimodules for horizontal coordinating dimensions

1 Scope and field of application

This International Standard establishes the values of multimodules for horizontal coordinating dimensions for use in modular coordination of buildings.

It is applicable to the design and construction of buildings of all types in accordance with the principles and rules of modular coordination laid down in ISO 2848, *Building construction — Modular coordination — Principles and rules*.

2 Specifications

The international standardized values of multimodules for horizontal coordinating dimensions are

3 **M**¹⁾, 6 **M**, 12 **M**, 30 **M** and 60 **M**.

NOTE — The multimodule 15 **M** may also be used for special applications.

1) 1 **M** = 100 mm (see ISO 1006, *Building construction — Modular coordination — Basic module*).
