FOREWORD

ISO (the International Organization for Standardization) is a worldwide federation of national standards institutes (ISO Member Bodies). The work of developing International Standards is carried out through ISO Technical Committees. Every Member Body interested in a subject for which a Technical Committee has been set up has the right to be represented on that Committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work.

Draft International Standards adopted by the Technical Committees are circulated to the Member Bodies for approval before their acceptance as International Standards by the ISO Council.

International Standard ISO 3848 was drawn up by Technical Committee ISO/TC 54, *Essential oils*, and was circulated to the Member Bodies in June 1975.

It has been approved by the Member Bodies of the following countries :

Belgium	Italy	Spain
Canada	Netherlands	Thailand
France	Portugal	Turkey
India	South Africa, Rep. of	U.S.S.R.

No Member Body expressed disapproval of the document.

Oil of Java citronella

1 SCOPE AND FIELD OF APPLICATION

This International Standard specifies certain characteristics of oil of Java citronella, with a view to facilitating the assessment of its quality.

3 DEFINITION

oil of Java citronella: The product obtained by steam distillation of the aerial parts, fresh or partially dried, of *Cymbopogon nardus* (Linnaeus) W. Watson var. *mahapengiri* Winter syn. *Cymbopogon winterianus* Jowitt cultivated in South-East Asia, in India, in Indonesia, in Central and South America.

4 SPECIFICATIONS

4.1 Appearance

Clear, mobile liquid.

4.2 Colour

Pale yellow to pale brownish yellow.

4.3 Odour

Characteristic, recalling that of citronellal.

4.4 Relative density at 20/20 °C

Minimum : 0,880

Maximum : 0,895

4.5 Refractive index at 20 °C

Minimum : 1,466 0

Maximum : 1,473 0

4.6 Optical rotation at 20 °C

Range – 5° to – 0°

4.7 Solubility in 80 % (V/V) ethanol at 20 °C

The solubility in 80 % (V/V) ethanol at 20 °C shall be 1 volume in 2 volumes to give a clear solution. Sometimes opalescence can be observed on continuing the addition of ethanol.

4.8 Ester value after acetylation

Minimum : 250 — corresponding to 85 % of constituents liable to acetylation, expressed as geraniol.

4.9 Carbonyl value

Minimum : 127 — corresponding to 35 % of carbonyl compounds, expressed as citronellal.

5 SAMPLING

See ISO 212.

Minimum volume of final sample : 50 ml

6 METHODS OF TEST

6.1 Relative density at 20/20 °C

See ISO/R 279.

1) At present at the stage of draft. (Revision of ISO/R 280.)

2) At present at the stage of draft. (Revision of ISO/R 592.)
