

AEROSPACE MATERIAL SPECIFICATION

AMS 2806B

Issued JUL 1976
Revised SEP 2000
Reaffirmed OCT 2005

Superseding AMS 2806A

Identification Bars, Wire, Mechanical Tubing, and Extrusions Carbon and Alloy Steels and Corrosion and Heat Resistant Steels and Alloys

1. SCOPE:

1.1 Form:

This specification covers procedures for identifying bars, wire, mechanical tubing, and extrusions of carbon and alloy steels and corrosion and heat resistant steels and alloys.

2. APPLICABLE DOCUMENTS:

Not applicable.

3. TECHNICAL REQUIREMENTS:

3.1 Marking Methods:

The product shall be identified in accordance with 3.1.1 except that, when specified by purchaser, straight bars and mechanical tubing over 0.500 inch (12.70 mm) in nominal OD or least width of flat surface shall be marked in accordance with 3.1.2.

3.1.1 Bundling and Tagging:

- 3.1.1.1 Straight bars, wire, tubes, and shapes shall be securely bundled and identified by a durable tag marked with not less than the purchase order number, the applicable material specification number including its revision letter if any, heat number, nominal size, and manufacturer's identification and attached to each bundle, or shall be boxed and the box marked with the same information

SAE Technical Standards Board Rules provide that: "This report is published by SAE to advance the state of technical and engineering sciences. The use of this report is entirely voluntary, and its applicability and suitability for any particular use, including any patent infringement arising therefrom, is the sole responsibility of the user."

SAE reviews each technical report at least every five years at which time it may be reaffirmed, revised, or cancelled. SAE invites your written comments and suggestions.
